

# Educated by Nature

*Educated by Nature* is an exhibition that brings two important educational projects located in Brighton and Hove to the city's central library. The exhibition considers and celebrates what nature might teach us and what actions might follow.

The exhibition offers a glimpse into each of the featured projects, *Creating with Uncertainty* from the University of Sussex and Brighton and Hove's city-wide schools' project *Our City Our World*.

**Jubilee Library, Brighton, 17th to 23rd July, 2023.**

**Drop-in 'compost' workshop: Saturday 22nd July, 11 to 3pm.**

Everyone welcome to use sound technology and microscopes to explore and discuss the fascinating world of compost with an expert, Michael Kennard.

The exhibition is supported by the Higher Education Innovation Fund (HEIF)
